

Experienced Responsive Cost Effective

SurvBase is
a strong addition
to your project team

- ▶ SurvBase provides project basemapping quickly and efficiently.
- ▶ SurvBase knows your project environment—we provide products that are well organized and easy to work with.
- ▶ SurvBase understands mapping objectives for engineering and land development projects—you'll get the products you need.
- ▶ SurvBase has substantial mapping and boundary resolution expertise.
- ▶ SurvBase has DOT/PF, MOA PM&E, AWWU, DNR, BLM, ANTHC, COE, and ARRC experience.
- ▶ Contact SurvBase now to include SurvBase on your project team.

Experienced • Responsive • Cost Effective

SurvBase was founded by Steve Buchanan, P.L.S. and John Kerr, P.L.S., CFedS.

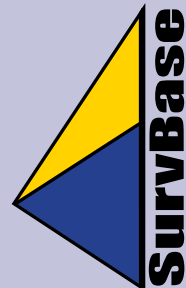

Steve has worked for the Bureau of Land Management, private sector firms, and has been a professor for the Geomatics program at UAA.

John has worked as a Right-of-Way Engineer and Survey Manager for DOT/PF, private sector firms, and the ANTHC. He has also taught digital cartography classes at UAA.

SurvBase provides cost-effective surveying and mapping products and expertise.

Comprehensive Surveying & Mapping Services

ALASKA
AND ITS RELATION TO THE
UNITED STATES AND THE ORIENT

Scale 50,000,000

- Topographic Basemapping
- Right-of-Way Basemapping
- Survey Control Sheets

- Parcel Maps / Plats
- Legal Descriptions
- Site Control Documents

Field Services

- Topographic/Design Surveys
- Control Surveys
- Boundary Surveys
- Right-of-Way Surveys
- Aerial Mapping Control
- Construction Staking
- Quantity Surveys
- Position Monitoring
- Small Hydrographic Surveys
- Bridge Site/Drainage Surveys
- Project As-Builts

- Design Surveys
- Boundary Surveys
- Control Surveys

SurvBase - simply done right.

Perspective

SurvBase professionals have worked in both the private sector and the public sector. From proposal preparation and evaluation through product delivery: We know what is needed. *SurvBase provides these products and services efficiently.*

Well Connected

SurvBase knows your clients. SurvBase professionals have been extensively involved with the Alaska survey community for 25+ years. Our professionals' active involvement in education, professional societies, and community activities have built positive relationships with your clients. *SurvBase is here to stay.*

Production and Quality Control – Automated Mapping Tools

SurvBase uses advanced feature and linework coding in the field (including break/fault lines), fully set-up template drawings, and comprehensive description key files.

These techniques automate much of the topo basemapping process. This reduces costs by saving time and reducing errors. The SurvBase approach makes it possible for the field crew to easily build and check the raw topo basemap. In remote locations, the field crew leaves after the TIN and mapping are field checked.

SurvBase mapping meets project objectives.

Fully Digital

SurvBase uses digital field equipment where it is cost effective. The use of digital field equipment (GPS, robotic total stations, and levels) increases production and reduces the potential for errors. For example: Our robotic total stations automatically

recognize and track the prism. There is no time spent pointing the instrument and no measurable sighting error. *SurvBase clients get better products at lower cost.*

"Everything should be as simple as possible, but no simpler."

Albert Einstein
